

**RightSource
Services**

CAPABILITIES STATEMENT

About The Company

RightSource works with corporate and government entities to improve procurement activities. Established in 1997, our services initially focused on providing consulting support for the procurement process for clients. That included utilizing our operations analysts to build solicitations and manage the related administrative work involved in sourcing, evaluation, and execution of vendor contracts. In 2018, we expanded to provide procurement outreach and training for small businesses. We collaborate with entities like SBDCs, Caltrans, and corporations to develop customized training programs, aiming to increase small business engagement. Our comprehensive training is tailored to meet the specific needs of each client, ensuring small businesses are well-informed about expectations and requirements from bidding through execution.
